CONTRACTOR AND ASSOCIATE CAPACITY

US-hours privacy and AI Act capacity for your team

I work alongside your DPO or counsel on GDPR and EU AI Act projects, with a technical eye on what the product actually does with data.

WHO I AM

I'm Chris Williams, a privacy and AI governance consultant. I hold the CIPP/E and AIGP certifications and have a decade of software engineering experience.

I can read code and test how an AI system handles data, not only review the paperwork. I'm currently implementing an AI management system and acceptable use program for a US healthcare organization.

CIPP/E	European data protection (IAPP)
AIGP	AI governance professional (IAPP)
10 yrs	software engineering
10–15 hrs	a week available, full US working day

WORK I CAN TAKE ON

DPIAs and AI DPIAs

Screening, drafting and risk measures, ready for your DPO's review and sign-off.

EU AI Act readiness

Role (provider or deployer), risk class, transparency duties and AI literacy (Art. 4).

Records and vendor reviews

Records of processing, DPA and sub-processor reviews, and transfer checks.

Technical reviews

What the code sends where, retention and deletion, for AI vendors and client products.

AI policies and training

Acceptable use policies, approved tools lists, incident procedures and staff AI literacy training.

Framework gap assessments

ISO/IEC 42001 and NIST AI RMF gap assessments and AI management system setup.

WHERE I FIT

- **Outsourced DPO and privacy firms** that need extra capacity, especially for US clients and US hours.
- **Clients building or deploying AI:** SaaS, health tech and AI-native start-ups.
- **Work that needs a technical eye:** where the question is what the product does with data, not only what the policy says.

HOW WE'D WORK

1. **Intro call** about your clients and how you deliver.
2. **A first scoped piece,** or shadowing one client account.
3. **Ongoing hours each month,** as a contractor through Built Compliant.

Frameworks I work with: GDPR and UK GDPR, the EU AI Act, ISO/IEC 42001 and the NIST AI RMF. I don't give legal advice, and I don't act as an EU or UK representative.
